CAZ CLARKE

The Pentyrch Incident is probably the biggest ufo case in the UK of a military shootdown and retrieval of a ufo and the covert cover-up that followed. Huge explosions, broken trees, strange men in white forensic suits, shaking buildings and 3.8 billion pounds worth of equipment in the air, and that's just the tip of the iceberg. This was a real situation, using real munitions over a residential area and next to a hospital in what the military call silent hours.

The official story is, this was "just" a military exercise.

This presentation is an update of new information, with new primary witness testimonies and a first hand account from another primary witness who will be speaking publicly for the first time. You will also hear evidence of the conspiracy to cover up this incident by the mainstream media, South Wales Police, the Ministry of Defence, the Royal Air Force and the Royal Mint. I do not use these words lightly and have spent the last seven years exposing the lies and the cover-up in order to bring you the truth and today I will prove it.
