SPEAKER BIO

MARIA WHEATLEY

Maria is a second-generation dowser who is a leading authority on the geodetic system of earth energies. She was taught how to decode and divine the land by her late father, Dennis Wheatley, who was considered to be one of the UK's top Master Dowsers.

Maria leads sacred site tours and dowsing tours - small groups, private 1-2-1, or larger groups are all welcome to sites such as Stonehenge, Avebury, Glastonbury, Ireland, Scotland, France and Prague www.theaveburyexperience.co.uk

Maria also offers educational certificated tours for those interested in dowsing techniques that are not taught anywhere else in the world. She was taught dowsing by a European master Dowser and Chinese Geomants and she blends eastern philosophy with Western wisdom.

Maria is an accomplished author of books on sacred sites and dowsing. She has researched the esoteric design canons of prehistoric sites, Druidic ceremonial enclosures and the Knights Templar for many years. Maria has studied Neolithic Britain and Bronze Age prehistory with the University of Bath and alongside other professionals, Maria combines her knowledge of archaeology, and earth energies with state of the art equipment to locate and detect the hidden frequencies that the Earth emits. Believing in the Earth Force or dowsing is simply not enough for Maria, she wants to show the world that the prehistoric designers of ancient sites could locate and harness earth energy. Her findings challenge our understanding of sacred sites.
